

Gas Up for Motorbike on PlayStation®3 Computer Entertainment System

Indie Stunt Bike Game Hits PlayStation®Network

Key Biscayne, Fla. - June 25, 2013 - baKno Games announced today that *Motorbike*, the addictive dirt bike trials game, is now available for purchase on PlayStation®Network for PlayStation®3 computer entertainment system. *Motorbike* combines the simple gameplay dynamics of motocross games with unique challenges to create an exciting stunt run experience.

Easy to play but difficult to master, *Motorbike* pits players against mind-bending obstacle courses too intense for real-life bikers. Using the controller to accelerate, balance, and perform tricks, players must traverse a variety of hazards to reach each finish line. Choose a rider, bike, and course, and then cut loose.

"Motorbike is the result of years in development," says Andres Martinez, founder of baKno Games. "We gave special attention to physics realism, graphics quality and gameplay variety. Variety is achieved by the Track Editor which I think is the killing feature in *Motorbike*. At baKno we created all the original tracks using the same editor, and players can share their creations. So far almost 3,000 tracks have been created by *Motorbike* fans, and we are adding new tracks on a daily basis."

Motorbike features 80 Original tracks, thousands of online tracks, and 40 PS3™ Exclusive tracks with the potential for thousands more. With the easy-to-use (yet surprisingly extensive) Track Editor, players can construct their own challenges with the dozens of doodads that the game has to offer (including some PS3™ exclusive items!). Trace the track to get started, give it a theme, and tinker with a wide range of diverse contraptions for endless possibilities. After toying and testing, players can share their creations online. All Custom tracks undergo an internal revision before publication to make sure they are fun, challenging and finish-able.

OneClickMac gave the Mac version of *Motorbike* a perfect score, saying, "Motorbike fulfills every boy's dream of becoming a skilled and daring trials biker, facing deadly obstacles and challenging jumps." The Apple Clan expressed praise for the mobile version, saying, "Besides life-like settings, the bike movements, the track, the obstacles littered about, and the bikes themselves, even the riders all appear realistic."

Ride, create, and feel the flow in *Motorbike*, now available on PlayStation Network for PS3™!

About baKno Games

baKno is an independent game development studio based in Key Biscayne, Florida, composed by a group of video game enthusiasts who are committed to create the most engaging gaming experiences. baKno develops casual games for desktop, mobile and consoles.
